ABOUT ME

I am an **AI/ML enthusiast** and a student experienced in building and deploying models on large datasets, deploying solutions. With a background in **Backend Development** and **Pipeline Designing**, I bring strong problem-solving skills to AI/ML projects.

SKILLS

- Python, FastAPI, Django, Libraries (Significant), HuggingFace, Tensorflow
- ML, NLP, LLMs, Prompt Engineering
- Kaggle, Git/GitHub, Jupyter Notebook, VS Code, Arduino, Java
- MySQL, MongoDB, PostgreSQL, HTML, CSS, Javascript, NodeJs, C, C++
- Docker, Kubernetes, CNCF(beginner)

EXTRA

- [Codeforces: 877](#)
- [HackerRank: 205](#)
- [CodeChef:](#)

WORK EXPERIENCE

BRITTOO.XYZ ----- **Sept 2025 - Present**

AI/ML Engineer

Developed NLP pipelines and LLM-based solutions to facilitate campus rental services. Also I implemented text classification, entity recognition, and semantic search. Also built a Chatbot for easier negotiation. Recently I added an AI based security layer for the protection of their website.

VIVASOFT LIMITED ----- **Feb 2026 - Mar 2026**

Software Engineering Intern

Built a RAG-based semantic search pipeline for an Office Management System (OMS) to enable intelligent document and knowledge retrieval. Developed backend services in Go, quickly adopting the language to deliver production features. Implemented wiki-style knowledge indexing and KPI-based result scoring to improve search relevance and internal information access.

PROJECTS

EDUPREDICT - AI PERFORMANCE ANALYSIS PLATFORM

- Built a full-stack web app with FastAPI and Next.js/React (TypeScript) for student performance risk prediction.
- Implemented an ML ensemble (LightGBM + Logistic Regression) with SHAP-based feature attributions for explainability.
- Added role-based access control (student/teacher/admin) with secure authentication and protected routes.
- Developed interactive dashboards for managing academic records and viewing analytics/insights.

SMART RURAL HEALTH ASSISTANT

Developed a full-stack, bilingual AI health diagnostic tool using FastAPI, Streamlit, and Scikit-learn to provide accessible disease prediction and severity triage for underserved rural populations.

- ML & Logic: Trained Scikit-learn classifiers (TF-IDF) to predict 20+ diseases and implemented a rule-based engine for critical severity triage.
- Tech Stack: Python, FastAPI, Streamlit, Scikit-learn, Pandas, NumPy.

EDUCATION

Bachelor of Engineering

Major: Computer Science & Engineering

Rajshahi University Of Engineering & Technology

EXTRACURRICULAR ACTIVITIES

Program Secretary, Cultural Club

RUET | Onuronon Cultural Club

Workshop Secretary, Adventure Club

Ovijatrilk - RUET Adventure Club

Planning Secretary, Divisional Club

SDAR - Sylhet Divisional Association, RUET
